DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. **Claim(s) 84-93** are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. "A computer program product" is no a proper language to use for this type of claim. The limitations claimed are software, which rendered the claims non-statutory.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. **Claim(s) 64-93** are rejected under 35 U.S.C. 102(e) as being anticipated by Bowman-Amuah (US 6,707,812 B1).

Regarding **claim(s) 64**, Bowman-Amuah discloses a method for enabling a web application to communicate with a telephony device (column 1, lines 8-11), comprising: providing a communication channel between the web application and the telephony device (column 17, lines 15-23); and translating web application data from the web application into a telephony device data format of the telephony device (column 17, lines 29-48).

Regarding **claim(s) 65, 75 and 85**, Bowman-Amuah discloses a method wherein translating web application data further comprises: translating web application control data from the web application into a telephony device control data format of the telephony device (column 17, lines 29-48).

Regarding **claim(s) 66, 76 and 86**, Bowman-Amuah discloses a method wherein translating web application data further comprises: translating web application media data from the web application into a telephony device media data format of the telephony device (column 17, lines 29-48).

Regarding **claim(s) 67, 77 and 87**, Bowman-Amuah discloses a method further comprising: using a telephone device abstraction (column 17, lines 15-28).

Regarding **claim(s) 68, 78 and 88**, Bowman-Amuah discloses a method wherein using a telephony device abstraction further comprises: using an abstraction for a class of telephony devices (column 17, lines 15-28).

Regarding **claim(s) 69, 79 and 89**, Bowman-Amuah discloses a method further comprising: routing data transferred between the telephony device and the web application; and arbitrating access to the telephony device (column 17, lines 15-28).

Regarding **claim(s) 70, 80 and 90**, Bowman-Amuah discloses a method further comprising: providing a service plug-in (column 17, lines 15-28).

Regarding **claim(s) 71, 81 and 91**, Bowman-Amuah discloses a method further comprising: mapping the data to a telephony device resource (column 17, lines 15-28).

Regarding **claim(s) 72, 82 and 92**, Bowman-Amuah discloses a method further comprising: converting telephony device data to a wrapper API data format (column 17, lines 29-48).

Regarding **claim(s) 73, 83 and 93**, Bowman-Amuah discloses a method wherein the web application is another wrapper (column 17, lines 15-28).

Regarding **claim(s) 74**, Bowman-Amuah discloses an apparatus for enabling a web application to communicate with a telephony device (column 1, lines 8-11) comprising:

means for providing a communication channel between the web application and the telephony device (column 17, lines 15-23); and
means for translating web application data from the web application into a telephony device data format of the telephony device (column 17, lines 29-48).

Regarding **claim(s) 84**, Bowman-Amuah discloses a computer program product comprising: a computer usable medium having computer readable code embodied therein for enabling a web application to communicate with a telephony device (column 1, lines 8-11), comprising,

computer readable code for causing a computer to provide a communication channel between the web application and the telephony device (column 17, lines 15-23), and

computer readable code for causing a computer to translate web application data from the web application into a telephony device data format of the telephony device (column 17, lines 29-48).

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gerald Gauthier whose telephone number is (571) 272-7539. The examiner can normally be reached on 8:00 AM to 4:30 PM.
